NATIONAL AGENTS ALLIANCE,

Plaintiff,

v.

SHAWN L. MEAIKE, MARC J. MEADE,
BRYANT STONE, FRANK EUFEMIA,
JAIME EUFEMIA, and MICHAEL
SIZER,

Defendants.

**AFFIDAVIT OF
JASON MCCOLLOUGH**

AFFIDAVIT OF JASON MCCOLLOUGH

Jason McCollough, being first duly sworn, says:

1. I am over the age of 21 years and have personal knowledge of the matters set forth in this Affidavit.

2. I am a digital forensics examiner employed by Guardian Digital Forensics in Raleigh, North Carolina. I have a Masters of Science Degree in Digital Forensics and Bachelor of Science Degree in Information Systems from the University of Central Florida.

3. I have attended approximately 175 hours of forensic training in relation to cellphone forensics, computer forensics, and e-discovery.

4. I have worked on over 200 cases involving murder, rape, intellectual property, fraud, wrongful death, employee wrongdoing, and e-discovery collections among numerous other types of cases. Based on my education, training, and experience, I have qualified and testified as an expert witness in a capital murder case in North Carolina, qualifying as a Computer Forensics Expert. *See **Exhibit A.***

5. On August 5th, 2014, I received a HTC One (M8) cell phone SN: FA44PWM05947 belonging to George M. Wilson, via courier, from Bryan Starrett of Brooks, Pierce, McLendon, Humphrey & Leonard LLP.

6. After receiving the HTC One cell phone, I acquired the cell phone using Cellebrite UFED Touch for further analysis.

7. As part of my analysis, I located two voicemails containing the name "18603171324_1398899592000.amr" and two screenshots related to a voice message received on April 30th, 2014.

8. My analysis of HTC One cell phone further revealed that based upon the file naming convention of the two voicemails the voicemail was received on April 30th, 2014 at approximately 6:13 PM. The date and time of the voicemail(s) on the HTC One cell phone was determined through analysis of the time stamp, stored in a Unix millisecond value, included in the file naming convention of the voicemail(s), and through analysis of the timestamps in relation to the user created screenshots of the voicemail. See **Exhibit B & C**.
